Subject: HOTSITE REPORT: Update - Freedom Industries, Charleston, WV

OSC Dennis Matlock reported that the facility focused on pumping operations, including the interceptor trench, the oil/water separator loading area, and the water levels in the containment areas. The facility is also preparing for the installation of HDPE liner in the interceptor trench this week

The facility continues to load the remaining marketable product into tanker trucks for transport off-site. In addition, the first shipment of waste water from Poca Blending Facility will be transported to Waste Management DSI in Hurricane, WV on Monday, February 24. The waste water will be solidified and tested prior to disposal. .

WVDEP Enforcement collected a water sample from a seep on the bench area, near monitoring well MW-6.
